

NEW CLASS

Edmonds Community College Green Building Decisions

Spring 09, Tuesdays 6pm-8:40pm

Room: SQL 205

CIT 155 – 3 cr.

Instructor: Randy Sibley

“Green” is out of the box. It’s everywhere - in the stimulus package, on the radio, in the news, at the stores and in your homes. What exactly is it? Is it the same as ‘sustainability’? Is it about...

- Global warming
- Toxic molds
- Population growth
- Plastic decking
- Solar PV
- Peak oil

Come explore these issues and find out how to navigate your way through the maze of green building decisions. If you are a homeowner, remodeler, builder, designer or apartment manager this class is for you! Practice making these decisions by examining and discussing green topics. Learn about the programs that list and prioritize these decisions for you:

- Built Green
- LEED
- Energy Star
- and more....
